Metallurgia — Index to Volume 48

JANUARY—DECEMBER 1981

A

Advanced developments in EDM ... 211
Advanced equipment and techniques achieve consistent superalloy quality 167
Advanced techniques for special alloys 34
Alcan Aluminium (UK) Ltd., a review from 298
Alcan Plate Ltd., investment programme progress report ... 356
Alform Alloys Ltd., developments with the Conform process at ... 309
Alloy extrusion at Hansel-Werke, light 229
Alloy improves engine discs, new 537
Alloy furnace carriers chosen for heat treatment 185
Alloy scrap for remelting, processing of complex 22
Aluminium alloys, solution treatment plant for 496
Aluminium alloy wrought and cast products, heat treatment of ... 327
Aluminium and copper-rich tubes, indirect extrusion of 219
Aluminium, continuous casting of 318
Aluminium Extruders award prizes for good design 233
Aluminium extrusion, recent technical developments save energy in 98
Aluminium, impact extrusion of ... 230
Aluminium, new trends in melting and holding furnaces for ... 324
Aluminium project nears completion 356
Aluminium reprocessing problem ... 332
Aluminium smelting, cleaning waste gases from 339
Aluminium stockholding — a real service to industry 331
Aluminium strip, high production of 332
Aluminium — the present, and future prospects (Comment) ... 293
Aluminium, vacuum furnaces braze 240
Aluminium — where are we now, where are we going? 298
Annealing and tempering by induction heating 284
Applications for continuous brazing 241
Automan 81, robotics on show at 196
Automated heat treatment facility for German forge 437
Automatic forge installation boosts tool production 436
Automatic lubrication shows advantages 275

B

B & S Massey — traditional expertise provides springboard for new technology 12
Big investment in new drop forge 204
Big savings possible from high temperature thermal insulation ... 281
Black Country Museum: workshop of the world revisited 92
BNF — a centre for metals information 40
BNF, recent research and development 549
Brazing, practical aspects of vacuum 234
Britain's historic furnace heritage (Comment) 201
British scrap industry gears for the 1980's 28
Burners conserve energy 199
Burner systems for furnace firing ... 141

C

Capital investment scheme for closed-die forgings 470
Carburised gears — past and future 481
Carburised gears — past and future (Part II) 599
Cast radiant tubes — new and traditional applications 185
CECOF — Trade Association Committee in perspective 363
Centrifugal castings of thin wall tubes 180
Ceramic-fibre anchoring, secure studs for 403
Cleaning waste gases from secondary aluminium smelting 338
Cold forging and extrusion — present position and future prospects 110
Cold forming, industrial scene in ... 120
Company builds around new extrusion technology 309
Competition for diecasting (Comment) 201
Conform process at Alform Alloys Ltd., developments with the ... 309
Continuous casting aluminium ... 318
Continuous vacuum sintering ... 540
Contract heat treatment 1981 ... 91
Copper sintering, INCRA investigates 540
Curb on noise (Comment) ... 417

D

DFRA Annual General Meeting and Conference 268
Depth of experience in furnace range 396
Design aspect of clean vacuum furnaces 396
Developments in super corrosion-resistant alloys 181
Developments in vapour phase soldering 243
Dies and moulds, improvements in the production of 211
Diversa Metals Ltd., a report on the operations of 34
Doncasters Blaenavon, expansion at 426
Doncasters Monk Bridge Ltd., recent developments at 159
Drop forge, big investment in ... 204
Drop forging industry — Massive investment in new installation ... 256
Drop forging of steel in Spain ... 469
Drop forging plant, improved environment at a 498
Drop forgings — a bright future, production of aluminium alloy ... 303

E

Economics of nitrogen-based carburising atmospheres 594
EDM — advanced developments in 211
Effect of molybdenum on sulphidation resistance of nickel-base superalloys 181
Electricity for melting returns ... 35
Electric furnaces — housekeeping and economics 375
Electric heating, the trend towards 568
Electroslag remelt systems installed by National Forge 244
Energy conservation discussed at DFRA 268
Energy conservation in the heat-treatment industry 401
Energy efficiency, heating equipment boosts 140
Energy savings, heating efficiency and 132
Equipment boosts efficiency in sinter sortin 98
Eurofour: the heat is on for Paris show 192
European furnace industry shows a united front 363
Eurotherm closes the loop ... 44
Expansion at Doncasters Blaenavon 426
Expertise in tooling for powder metal industry 537
Extrusion — present position and future prospects 110
Extrusion technology, company builds around new 309

F

Ferraforge demonstrate Telemanipulator 522
Fibre veneering system shows great promise 191
Forge, automated heat-treatment facility for German 437
Forge for the 80's (Comment) ... 249
Forge installation boosts tool production, automatic 436
Forge, Rose Cottage 18
Forge shop, robots in the 433
Forging activities at Martin Marietta Aluminium, USA 334
Forging industry, technology transfer in the 6
Forging manipulators, mobile ... 435
Forging Today — a roundup from the industry 433
Forgings, closed-die, capital investment for 470
Forgings demand special equipment and techniques, high integrity ... 443
Foundry 81 International preview ... 54
Foundry 81 (Comment) 49
Fuel-fired combustion systems — towards a complete package ... 74
Furnace accessories — special components, special alloys 552
Furnace builder meets the challenge 400
Furnace firing, burner systems for 141
Furnace fixtures and fittings complete the picture 183
Furnace furniture, fixtures, fixings and spares 551
Furnace for the aluminium industry, process 485

Furnace heating by luminous walls 146
Furnace industry shows a united front, European 363
Furnace instrumentation and control 583
Furnace maintenance procedures — recommendations for best results 273
Furnace range, depth of experience in 396
Furnace specialist enjoys success ... 553
Furnace tubes cut heat treatment costs for Land Rover Ltd., superalloy 174
Furnace update saves fuel ... 191
Furnaces, design aspect of clean vacuum 396
Furnaces — equipment and material suppliers guide 385
Furnaces, heat treatment 406
Furnaces, hot retort vacuum-purge 397
Furnaces, melting and holding, for aluminium and other non-ferrous alloys, new trends in 324
Furnaces, melting, steel foundry commissions 400
Furnaces refurbished 415
Furnaces — special supplement ... 347
Furnaces, supported roller, show advantages 491
Furnaces, vacuum brazing, for semiconductor manufacture 413
Future for UK vehicle production (Comment) 249

G

Gas fired rotary furnace hearth furnace for tool production ... 401
Glass beads aid metals recovery ... 511
Great works clean-up, the 504

H

Hansel-Werke, light alloy extrusion at 229
Hard time for forgers (Comment) ... 153
Heat is on for Paris show, the ... 192
Heat-treated coatings prolong life of machine parts 497
Heat treatment — a practical guide to equipment selection 471
Heat treatment, alloy furnace carriers chosen for 185
Heat treatment, contract 91
Heat treatment furnaces 406
Heat-treatment in the metals industry 485
Heat treatment industry, energy conservation in the 401
Heat-treatment industry, instrumentation in 579
Heat treatment of aluminium alloy wrought and cast products ... 327
Heat treatment of tool steels, vacuum 86
Heat treatment facility for German forge, automated 437
Heat treatment practice — developments revealed at Aston seminar 69
Heat treatment today 80
Heating equipment boosts energy efficiency 140
Heating efficiency and energy savings 132
H.I.P. (Powder Metals) Ltd., new developments at 532
High emissivity refractory coating introduced 372
High integrity forgings demand special equipment and techniques 443
High precision low pressure sand castings 341
High production of pure aluminium strip 332
High temperature thermal insulation, big savings possible from ... 281
Hot retort vacuum-purge atmosphere furnaces 397

I

If you can't beat them —join them (Comment) 49
Impact extrusion of aluminium shows many benefits 230
Improved environment at a drop forging plant 498
INCRA investigates copper sintering 540
Indirect extrusion of aluminium and copper-rich tubes 219
Induction heating, annealing and tempering by 284
Induction heating boosts profitability 443
Induction furnaces installed in melting facility 43
Industrial scene in cold forming ... 120
Information, BNF — a centre for metals 40
Instrumentation in the heat-treatment industry 579
Instrumentation of metallographic laboratories 449
Introduction to powder metallurgy, an 523
Ion nitriding — a process with a future 64
Iron-powder metallurgy — new data 538
It's horses for courses in refractory selection 186

J

Just another cutback (Comment) ... 345

L

Land Rover Ltd., Superalloy furnaces tubes cut heat treatment costs for 174
Lead refinery designed to meet environmental costs 508
Light alloy company earns its wings 350
Light alloy extrusion at Hansel-Werke 229
Light alloys, what's new in ... 332
Light Metal Forgings Ltd., metal forming activities at 303
Low thermal mass refractories prove their worth 186
Lubrication, automatic, shows advantages 275
Lubricants, solid, show advantages in metal forming operations ... 280

M

Machining swarf, reconstitution of 544
Magnesium — advanced materials demand quality equipment ... 336
Maintenance — key to efficiency in the metal industries 276
Maintenance procedures — recommendations for best results, furnace maintenance 273
Marking for industry 285
Marking of metals 286
Martin Marietta Aluminium, USA, forging activities at 350
Massive investment in new installation — an act of faith in the drop forging industry 256
Melting furnaces boost reclamation industry 35
Metal forming activities at Light Metal Forgings Ltd. 303
Metal industries, maintenance — a key to efficiency in the 276
Metal scrap recovery today ... 31
Metallurgical laboratory instrumentation 457
Metallurgical fume agglomeration process 511
Metallographic laboratories, instrumentation of 449
Metals industry, testing times for ... 454
Metals recovery, glass beads aid ... 511
Metals information, BNF — a centre for 40
Metals, marking of 286
Metals, recent developments in the surface treatment of 56
Microprocessor system predicts soaking pit times for steelworks 354
Mobile forging manipulators ... 435
Molybdenum, effect of 181

N

NADFS elects new president ... 204
NADFS holds successful convention 564
National Forge, electroslag remelt systems installed by 244
Natural Gas — efficient use of vital resources 364
New developments at H.I.P. (Powder Metals) Ltd. 532
New trends in melting and holding furnaces for aluminium and other non-ferrous alloys 324
New alloy improves engine discs ... 537
New roll for ductile iron, a (Comment) 345
Nitrogen-based carburising atmospheres economics of 594
Non-toxic salt bath for case hardening 487

P

Powder metallurgy 523
Powder metallurgy, an introduction to 523
P.M. development at the forefront, Superalloys 528
Powder metal industry, expertise in tooling for 537
Powder metallurgy developments ... 537
Practical aspects of vacuum brazing 234
Pratt & Witney move into the 21st century 548
Problem with endless hot water, the (Comment) 517
Process furnace for the aluminium industry 485
Processing of complex alloy scrap for remelting 22
Production of aluminium alloy drop forgings — a bright future ... 303
Propaganda for forging (Comment) 465

Q

Quality control and determination of surface treatments monitored by surface spectroscopy 453

R

Recent developments at Doncasters Monk Bridge Ltd. 159
Recent developments in the surface treatment of metals 56
Recent research and development at BNF 549
Recent technical developments save energy in aluminium extrusion ... 98
Reconstitution of machining swarf 544
Recycling superalloys — a specialised operation 182
Refractory coating, high emissivity 372
Refractory selection 186
Refractory veneering achieves energy savings 283
Refractories, prove their worth, low thermal mass 186
Repair company's rapid growth ... 553
Robotics on show at Automan '81 196
Robots in the forge shop 433
Rose Cottage Forge 18

S

Salt bath for case hardening, non-toxic 487
Scrap industry gears for the 1980's, British 28
Scrap recovery and reclamation: news, plant and application studies 35
Scrap recovery today, Metal ... 31
Scrap reprocessing plant solves Aluminium's feedstock problem 332
Secure studs for ceramic fibre anchoring 403
SIFE discusses reorganisation of the Society's future 531
SIFE Technical Committee review 273
Sinter sorting, equipment boosts efficiency in 98
Sintering, continuous vacuum ... 540
Sintering, INCRA investigates copper 540
Sintering of special tool steels, vacuum 534
Soaking pit times for steelworks, microprocessor system predicts 354
Solid lubricants show advantages in metal forming operations ... 280
Solution treatment plant ...for aluminium alloys 496
Somebody's doing well! (Comment) 153
Steel foundry commissions melting furnaces 400
Soldering, developments in vapour phase 243
Spectroscopy, quality control . . . monitored by 453
Superalloy furnace tubes cut heat treatment costs for Land Rover Ltd. 174
Superalloy quality, advanced equipment and techniques achieve consistent 167
Superalloys — p.m. development at the forefront 528
Superalloys: recycling — a specialised operation 182
Superalloys, what's new in ... 178
Superplastic hobbing 206
Supported roller furnaces show advantages 491
Surface treatment of metals, recent developments in 56
Surface heat treatment practice — developments revealed at Aston Seminar 69

T

T. Williams Ltd., impressive new plant at 256
Technology transfer in the forging industry 6
Tempcon Exhibition: preview of ... 246
Testing times for the metals industry 454
Thermal insulation, big savings possible from high temperature 281
Titanium for aerospace applications 180
Too clever by half? (Comment) 101
Tool hardening installation ... 199
Tool steels, vacuum heat treatment of 86
Tool steels, vacuum sintering of special 534
Trend towards electric heating ... 568
Tube press used in non-ferrous processing 511
Tubes, cast radiant 185
Tubes, centrifugal casting of thin wall 180
Tubes, indirect extrusion of aluminium and copper-rich ... 219

V

Vacuum brazing in gas turbine manufacture 241
Vacuum brazing furnaces for semiconductor manufacture 413
Vacuum brazing, practical aspects of 234
Vacuum furnaces braze aluminium 240
Vacuum heat treatment of tool steels 86
Vacuum joining — a superior production technique 238
Vacuum sintering of special tool steels 534
Vapour phase soldering, development in 243

W

Wet leaves on the track! (Comment) 1
Who's card was that (Comment) 101
What's in store for 1981? (Comment) 1
What's new in light alloys ... 332
What's new in superalloys ... 178
Works clean-up, the great 504
Workshop of the world revisited ... 92
